

FRACTAL TRIO

Created in 2023

Accordion: Clément COUYSSAT

Violin: Beatriz Lopes da Silva

Cello: Fernando ESPIRITO SANTO

In this trio, the accordion, violin, and cello are no longer used merely as musical instruments but are treated as sound producers. Thus, a genuine symbiosis is created between these three artists, with the perfect symmetry shaped by the fractal structure.

This trio offers you a true journey through modernism, rich in diversity in terms of instrumental effects, allowing you to hear various timbral and coloristic effects. They explore the complementarity between the two string instruments and the wind instrument - the accordion - in a fusion of sound that creates unexpected perceptions.

Built around a central axis of original contemporary pieces, this musical journey is also composed of musical "bursts" with transcriptions (Piazzolla, Bloch...).
